1.0 - Music Player

The following figure below describes the main parts in the music player:

1. Top-Spectrums - The top spectrums of the current audio clip.
2. Music Icon - The icon of the current music.
3. Bottom-Spectrums - The bottom spectrums of the current audio clip.
4. Loop Music Button- Whether to set the music list as loop or not.
5. Play List - The play list of the music
6. Shuffle Button - Whether to select random music or not.
7. Music Slider - Music slider.
8. Speaker - Music speaker.
9. Previous Music Button - Change to the previous music.
10. Pause Music Button - Pause the current music.
11. Stop Music Button - Stop the current music.
12. Next Music Button - Change to the next music.
13. Speaker - Music speaker.
14. Music Name - The name of the current music.
15. Sound Level Slider - Controls the volume of the current music.

2.0 - Manage Music Clips

- Add/Remove/Edit your music clips in the Music Player component

- **Note:** Read the info messages in the Music Player component
- **Important** - Click on **Apply** button to save your new changes

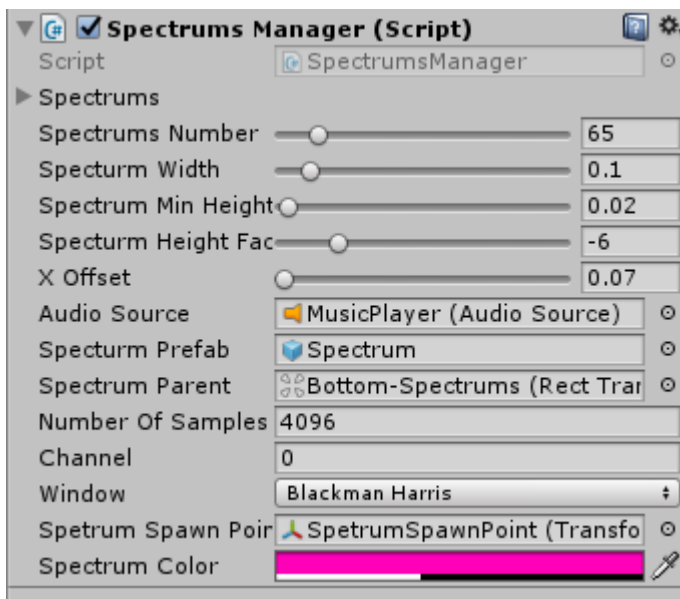

Using 2018.3 or Higher you will see custom Apply button instead

3.0 -Audio Spectrum

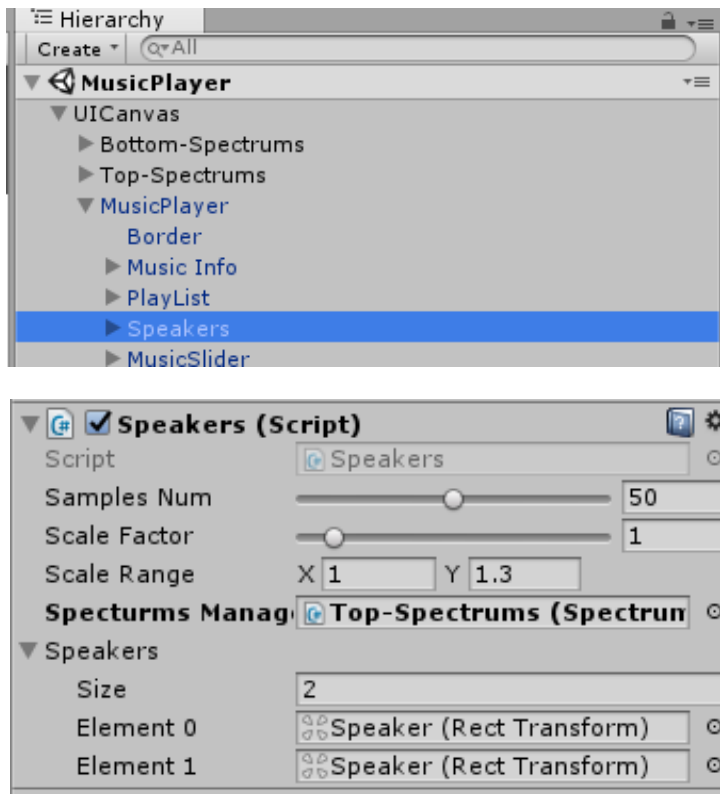

An audio spectrum displays the different frequencies present in a sound. Check the [link](#).

To create audio spectrums use the SpectrumsManager.cs script:

4.0 -Audio Speakers

To manage the speaker's impulse use the Speakers.cs script:

5.0 - More Details

If you have more questions, suggestions, comments, feature requests or bug detected, you can contact us and we would be happy to listen from you.
